Quick Screen Overview

Tool Overview

- Very simple, qualitative tool to identify and document ergonomic risk factors present at your worksite

© ErgoPlus. All rights reserved.

The screenshot shows the 'Quick Screen Data Collection' interface. It features a list of ergonomic risk factors, each with a checkbox and a small image illustrating the risk factor. The risk factors are:

- Lift outside power zone (or very heavy lift)
- Looking up, down, or to the side
- Heavy pushing
- Working away from the body
- Heavy pulling
- Bad grip
- Heavy carrying
- Hand-arm Vibration
- Contact stress

Each risk factor is accompanied by a small image showing a worker performing the task. At the bottom left of the screenshot, there is a small logo and the text '© ErgoPlus. All rights reserved.'

The Quick Screen is a very simple, qualitative tool to identify and document ergonomic risk factors present at your worksite. When you see an ergonomic risk factor, like heavy lifting, pushing, pulling, or looking up, down or to the side you document it using the Quick Screen. This will escalate the issue by flagging the job for further analysis.

When to Use It

When To Use It

- Ergo walks
- Prioritizing jobs for analysis
- Tool for supervisors and industrial athletes to escalate issues to assessment team

 © ErgoPlus. All rights reserved.

You'll find this tool very useful for Ergo Walks, which we recommend and are especially useful at the beginning of an ergonomic process when you need to prioritize jobs for ergonomic analysis.

It's also a great tool to empower supervisors and industrial athletes to get involved in the ergonomics process. It's simple enough for anyone to use to escalate ergonomic issues.
